

WHAT WE DO BEST

We design, build, and renovate homes and cabins of all shapes, sizes, and design styles for a wide range of budgets. Our clients are supported from concept development through construction completion and beyond.

ABOUT US

Howard Homes is a Minnesota-based builder that was founded in 1976. Second-generation owner; Dylan Howard, and his skilled team are known for producing high quality, energy efficient, environmentally friendly, beautiful homes throughout Minnesota. Not only does HH design, build, and renovate homes, but they do so while providing exceptional customer service and building lasting relationships.

"WE BELIEVE A HOME'S TRUE BEAUTY IS A REFLECTION OF THE HOMEOWNER'S BUILDING EXPERIENCE"

— Dylan Howard, Owner & President

Howard Homes does everything they can to make the building and remodeling experience enjoyable.

This includes listening to your dreams and expectations, involving you in the design process, advising you of the latest ways to build a healthier home, and keeping you informed every step of the way.

HH has built their reputation with a commitment to excellence. This commitment was acknowledged by both builders and consumers when receiving the BATC Reggie Award & Peoples Choice Award.

THE PROCESS

LOOKING TO START A BUILD OR REMODEL?

Join us at our Princeton, MN office and we can discuss not only your project scope and budget, but also your design preferences and goals. We can help guide you through the process of creating the home or cabin of your dreams.

DESIGNING YOUR HOME

Whether you are working with an architect, found a plan that you like online, or are starting from scratch, our in-house design team has the tools and experience to bring your vision to life.

We begin by building a Revit (our CAD system) model based on your wish lists, sketches, raw ideas, and budget constraints. The process includes drafting plans, discussing room layouts and finishes, and creating a fully-tourable 3D virtual model.

Once the first phase of the process is complete and we have a design you like, we hand the plans to our estimator for detailed and accurate pricing.

3D MODEL

MEETING YOUR BUDGET

Our mission is to find you the best quality and pricing on materials and labor used in building your home. We will work closely with you and other professionals in our field to strategically meet your project scope and budget needs without sacrificing your design.

CONSTRUCTION

From the moment we break ground to when the plastic is peeled off your windows, we will keep you informed every step of the way. Our skilled professionals in the field will keep in constant communication with our in-house team as your project progresses.

Regular meetings will be scheduled to not only keep you in the loop, but to cover any new questions or changes in your project design or budget.
